Community Engagement Survey Methodology

• This survey was conducted as part of a City-sponsored community engagement effort through which residents were invited to engage in defining what prosperity (in five domains) looks like in Albuquerque.
• Individuals were invited to engage in this process through completion of an online survey or by participating in a community dialogue and then completing the survey.
• The survey was fielded from October 20, 2014 to November 24, 2014.
• Data was collected through both on-line and hard copy surveys that followed community dialogue sessions and/or interviews/discussions with survey participants.
• A total of 1,859 residents of the City of Albuquerque participated in the survey.
• Respondents could complete the survey in either English or Spanish.
Community Engagement Survey Notes

• The top five responses to each survey question are provided below.

• Note that the percentage responses to odd numbered questions will total more than 100% as respondents were asked to pick their top five items.

• The percentage responses to even numbered questions represent the actual percentage of respondents choosing the particular response as respondents were asked to pick only one item.
Community Engagement Survey Notes

- The percentage of individuals offering an “other” response to each question were as follows:
